2. Gianyar

Unlike many cities in Bali, the government in Gianyar province has strict sanctions on new condominiums and hotels being built. As a result, the area is home to local entrepreneurs and there's a chance that the Balinese life will be preserved for future generations. This makes the area perfect for travelers who want to go off-the-beaten-path.

The Gianyar night market is known to have some of the best food in Bali and is sold from temporary stalls that pop-up each evening. The market also has handmade crafts, souvenirs, and clothing for sale - usually for a negotiable price. The cooking is truly mouthwatering and will expand your culinary knowledge of Indonesian food much beyond the iconic nasi goreng (Indonesian fried rice). Visitors to the night market can stroll, browse, and sample a variety of dishes thanks to the affordable pricing. A large group can take full advantage of the market by purchasing and sharing a wide variety of meals.

From Ubud, the night market can be reached in just 20 minutes via taxi – drivers will often wait for their passengers and provide a return service. The market is one of the main evening events for visitors staying in the Ubud area. The market and the surrounding area can be quite chaotic during peak hours of operation. Scooters line the side of the road near the market and traffic can get quite backed up.

Got an adventurous streak? If so, we think you might enjoy this tour. Get ready to have a wet and wild time in Bali, and no, a surfboard is not required. Bali's Hidden Canyon adventure is not an excursion for the faint of heart, but if you're a fan of caving/spelunking, and mountain climbing, this you'll You're going on a wet and wild A short introduction to why the client should choose this accommodation or activity.

Whitewater rafting is pretty extreme, but do you know what tops it? Battling a river's currents sans raft. Picture it — you're in the jungles of Sukawati on the island of Bali, Indonesia. The Oos River winds through some of the greenest and most rugged scenery you've ever witnessed. You hardly want to blink because you want to be sure that the image of this remains etched in your mind. The sound of flowing water; the color and clacking of the rocks; the simultaneous feeling of working up a sweat, and the chill of the river. Have we got your attention?

Bali's Hidden Canyon is not your average ravine. Officially known as 'Beji Guwang Canyon,' the peaceful scenery is deceptive in its beauty. At times, you'll not only be navigating slick rocks, you'll need to step on underwater stones that you can't even see. Wading is one thing, but navigating waters up to your neck is another. In short — bring aquatic shoes and a swim wear! Be mindful that the Hidden Canyon is considered a sacred space, so as a conscientious traveler, it is a respectful gesture to cover yourself with at least a t-shirt and shorts.

Why would you go through all of this trouble if you're supposed to be on holiday?

Because, your efforts are rewarded with nature's spectacular gifts, and an uncrowded trek. Needless to say, not everyone is up for this challenge, so you won't have to deal with dozens of other tourists hampering your experience. That means that you'll be able to relish each pool and waterfall that you'll see along the way.

Categorized as a 'moderate' activity level, be aware that its not uncommon for even the most rugged adventurers to grow a bit tired during this excursion, this is because of the combination of trekking and swimming. Your GoPro is optional, but a dry bag is not...you will get wet and you will have an amazing time!

3. Bangli

There are a surprising number of things to do in Kabupaten Bangli and they include:

1) Mount Batur

Mount Batur is ever present in much of Kabupaten Bangli and it's the island's second tallest active volcano. Hiking on its slopes for a spectacular sunrise view is a lot of fun and so is cooking eggs for breakfast in the volcanic steam vents!

2) Kehen Temple

This ancient and attractive temple complex is not on most tourist routes and you can learn about the local culture and get some amazing shots for Instagram in relative peace here.

3) Penglipuran Village

Penglipuran is a traditional village with a gorgeous village temple and some unique handicrafts. Look out for the giant banyan tree in the centre of the temple complex.

4) Lake Batur (Danau Batur)

This crystal clear volcanic lake is wonderful to look at, looks great in photos and has quite a few temples running around the shore.

5) Tibumana Waterfall

This gorgeous waterfall is a lovely place to stop after a short jungle hike and makes for some wonderful photographs.

6) Kintamani Highlands

This highland area in Kabupaten Bangli offers fantastic views of Lake Batur and Mount Batur and some of the best and most unspoiled village areas and natural areas on the island.

7) Kuning Waterfall

It's not the easiest waterfall to get to in Bali but this Bangli waterfall is gorgeous and way off the beaten path, which means if you get there, you get it all to yourself.

8) Mount Abang

The third tallest mountain on the island (not to be confused with Mount Agung which is the tallest and an active volcano, Mount Abang is a great place for hiking.

9) Tirta Sudamala Temple

A beautiful temple complex that sees almost no tourists. It's a water temple where you can witness purification rituals.

10) Batur Geopark

This is a cool introduction to the unique geology found in Kabupaten Bangli and in the volcanoes in the area.

11) Pande's Farm

A beautiful fully organic farm run in the traditional manner of Balinese agriculture. A place to learn about nature and the crops of the island.

12) Penulisan Temple

A stunning temple complex in the shadow of the mountain and set among the rice fields. Very much worth a visit.

13) Pura Taman Pecampuhan Sala

This is a holy spring temple and possibly, the least visited such temple on the island. However, be warned that if you opt to bathe in the sacred waters, the rocks can be quite sharp underfoot.

14) Toya Bungkah Hot Springs

A great place to bathe in the hot spring water from the volcano and to relax and let your muscle pains go.

15) Ulun Danu Batur Temple

This lovely temple on the shore of Lake Batur looks like it's floating on the lake water in the rainy season.

16) Pengibul Waterfall

A lovely waterfall in one of Bali's most friendly and welcoming communities. You can swim in the pool beneath the falls to cool down after a day in the hot Bali sun.

4. Klungkung

1) Klungkung Palace (Puri Semarapura)

The original 17th-century royal palace was burned down by the Dutch in 1908, but some buildings once used by the royal family are still standing. Its original name is "The Abode of the Gods" or Puri Semarapura in Indonesian.

The Semara Pura palace complex was used as a royal court and residence. It is an amazing example of intricate Balinese architecture. Today, the most prominent remaining buildings are the Floating Pavilion and Taman Gili Palace (Kertha Gosa). We highly recommend taking a tour!

Kertha Gosa Court of Justice is famous for its painted ceiling – it is the last remaining example of traditional Balinese Kamasan style art influenced by wayang puppet theatres, depicting rows of different moral lessons from Hindu epics.

Next to it, you will also find **Bale Kambang (Floating pavilion)** surrounded by a lily pond, and featuring beautiful carvings and a traditional thatched roof. It was probably used for events and gatherings by the royal household.

Living members of the royal family live in **Puri Agung Sempara** – a complex built next to the former palace, which you can also visit and see the black and white photos of the family! There is also a small Semarajaya Museum on the premises, which is included in the ticket. It overviews the history of Bali and has some art and curious artefacts.

2) Nyoman Gunarsa Museum

Nyoman Gunarsa is a famous local artist who now owns the Museum of Classical and Modern Art, where you can see his works and many other fantastic Balinese paintings.

Through art in this museum, you can get a glimpse of local life, culture, outfits, and religion. The majestic gates and a little garden around the territory add a nice, magical touch to the museum. It is not maintained in the best way possible, but worth a stop! Plus, it is close to Goa Jepang Klungkung.

3) Goa Jepang Klungkung

Easy to spot – right where the big elephant sculpture is, this stop is often overlooked by foreign tourists, and few actually know that it's here.

These caves and tunnels were built by the Japanese army during World War II when East Bali was under the control of Japanese forces.

Today, these caves are a bit creepy and inhabited by bats, and there are no active tours inside to learn more about the history of this place. You won't spend more than 30 minutes here.

4) Puputan Monument (Monumen Puputan Klungkung)

Easy to spot, this monument is at one of the main crossroads in Klungkung town, right next to the royal palace and Kertha Gosa.

Puputan is the ritual suicide that the royal family and local Balinese elite performed here in 1908 to show Dutch forces that they would rather die than surrender.

The monument looks like a big column and has a memorial at its base with a brief history of the events and some artefacts.

You don't need a guide to explore it, as all the information is provided in Indonesian and English. However, there is an entrance fee (about 50,000 IDR or 5 AUD) that you pay at the Royal Palace, and it grants you free access to the monument.

5) Bat Cave Temple (Goa Lawah)

Goa Lawah Temple is one of the nine directional temples – the most important temples for Balinese Hindus.

It was built in the 11th century next to an ancient cave filled with more than a thousand wild bats that still inhabit it!

You can visit the temple for a small entrance fee, and if you can around sunset, the bats will be more active and you can see them flying out of the cave.

Note that you can't enter the cave itself or touch the bats. There is also a huge bat statue by the beach in front of the temple.

6) Tirai Air Terjun Tukad Unda Waterfall

Not exactly a waterfall, Tirai Air Terjun Tukad Unda is actually a cascade formed by a dam on Tukad Unda river, and the spot is very close to the town centre.

Locals love to come here to chill, splash, swim, and take photos, and they lovingly call it a waterfall, so the name stuck.

Due to the tropical heat, the best time to enjoy this spot is sunset.

7) Pura Taman Sari Temple

A hidden gem, a Hindu temple of great cultural significance for Balinese kingdoms, and it is still standing intact!

During the Klungkung kingdom, this temple was a storage place for the weapons of the royal family.

It is very beautiful, but unfortunately, tourists aren't allowed inside; you can still take a photo of the gates or do drone footage.

6. Karangasem

1. Lempuyang Temple – The “Gates of Heaven”

Lempuyang Temple is one of Bali's most famous landmarks, especially because of the popular photo spot at the “Gates of Heaven.” Many people line up here for Instagram pictures.

But instead of waiting, you can hike further up the mountain to see one of the island's most spiritual areas. It's a journey worth taking if you want something deeper than just photos.

2. Tirta Gangga – The Royal Water Palace

Once a royal palace, Tirta Gangga (which means “Water of the Ganges”) is filled with fountains, ponds, tropical gardens, and statues inspired by Hindu mythology.

There are pools where you can take a dip, and just outside the palace, you'll find some of the most beautiful rice field views in Bali.

3. Ujung Water Palace (Taman Soekasada Ujung) – Bali's Floating Palace

Built in 1919, Ujung Water Palace (Taman Soekasada Ujung or Taman Ujung) is bigger and usually quieter than Tirta Gangga. Its bridges, gazebos, and pools make it feel like a fairytale setting.

Some visitors even find it more impressive than Tirta Gangga.

If you're visiting Taman Ujung, don't miss the unique "Bale Ship" entrance—it's one of the palace's most iconic features.

4. Besakih Temple – The Mother Temple of Bali

Located on the slopes of Mount Agung, Besakih Temple is the largest and most important temple in Bali.

Standing at about 1,000 meters above sea level, the complex has more than 20 temples and has existed for over a thousand years.

Every year, more than 70 ceremonies are held here, each tied to the wellbeing of Bali and its people.

5. Mount Agung – Bali's Tallest Volcano

Mount Agung is Bali's highest and most sacred volcano. Locals see it as a holy place, and sometimes climbing routes are closed during important ceremonies.

The trek is tough, but reaching the summit rewards you with one of the most breathtaking views on the island.

6. Amed – Diving and Black Sand Beaches

Love snorkeling? If yes, then Amed Beach in Karangasem is a must-visit.

Amed is a quiet stretch of fishing villages on Bali's northeast coast. The beaches here are covered in black volcanic sand, and the area is famous for diving and snorkeling.

It's close to Tulamben, home of the USAT Liberty shipwreck. Amed is also more affordable compared to Bali's busy tourist towns, making it great for [budget travelers](#).

7. Virgin Beach – A Hidden White Sand Spot

Unlike most beaches in East Bali, Virgin Beach has soft white sand. The waves can be strong, so swimmers need to be careful, but it's still a peaceful escape.

You'll find small cafes and facilities here, though it's best to skip the untrained beach massages offered by locals.

8. Sidemen Valley – Rice Fields and Village Life

Sidemen Valley is often called the "old Ubud" before mass tourism. Here, you can walk through rice terraces, meet local weavers, and enjoy views of Mount Agung.

It's a quiet and authentic area, perfect for slow travel. Some workshops even let you try silver jewelry making, adding a unique cultural touch to your visit.
